The information contained herein was garnered from fourteen months of aquarium-keeping by students of the Marine Option Program

AQUARIUM MAINTENANCE MANUAL

Spending about thirty minutes on aquarium maintenance every other week, helps prevent common and time consuming problems. The main goal of routine maintenance is a stable and balanced aquarium. If everything is running properly and your fish are healthy, there is no need for any major change, even if the pH or hardness is slightly out of range.

How to Start an Aquarium Maintenance Business - \$70k a ...

Fill up the tank with a hose pipe, (note if it is a small tank or you do not have a tap nearby you will have to use buckets). Use a water de-chlorinator after filling. Although there are no fish, chlorine and chloramines can build up over time. You will need a high quality dechlorinator for the life of your aquarium.

Beginner's guide to setting up your first aquarium

The other task that should be performed every week or two is the general cleaning of the tank. By performing light cleaning every couple of weeks, your tank will never get overly dirty. Wipe down the outside tank surfaces with a non-ammonia aquarium safe cleanser, or simply use a damp cloth.
