## **Basic fighter maneuvers - Wikipedia**

Air combat maneuvering (also known as ACM or dogfighting) is the tactical art of moving, turning and/or situating one's fighter aircraft in order to attain a position from which an attack can be made on another aircraft. Air combat manoeuvres rely on offensive and defensive basic fighter manoeuvring (BFM) to gain an advantage over an aerial opponent.

Meeting these weapons-firing requirements, while frustrating those of the enemy, must therefore be the goal of all fighter tactics and maneuvering. Before fighter tactics can be discussed effectively, an understanding of weapons systems must be developed, since these weapons are the driving forces behind tactics.
